

08/24/2026

- On the Today's Race the button to change games should say "Change Game" my wife didnt find it intuitive.
 - Also on the Free version use the same "Change Game" button but instead of "Pro" - changing game screen take them to the upgrade to pro screen as a free user
- On the landing page: Let's add a pop up if the user clicks "Start Brawl!" and if no name is added, the pop up will ask the user to confirm if they want to be called Bradley.
- On the Games Preview instead of "Star this game" change it to "Favorite this game"
 - The Walnut Drop Game Preview (clicked in) also looks weird. The walnuts are falling outside of the image frame.
- Walnut Game Issues
 - I ran multiple games and it "feels" like the two walnuts on the left and right side always wins. Is there a way to add an invisible barrier on the sides that "nudges" the walnuts to go towards the middle only at the start?
- Corgi Race Issues
 - When multiple people back an item, the name plate doesn't follow the corgi
 - Check if this is also happening for Walnut Drop
 - Remove the overlay of the finish line checker flag since the background art already have a finish line, it doesnt look natural
- Add Vegan as a default food option
- Make the Pro just \$1
- I'm not sure if it's because this is just a demo or if this is a bug, but anytime I choose a custom option - the result is always "no restaurants nearby" when I know there are restaurants nearby. A simple example is "Fried Chicken" i know for a fact there's a Popeye's Louisiana Fried chicken less than a mile from my house. I even checked the hours and they were indeed open and delivering on Doordash.
